Introduction

This guide describes how to update the firmware on the NBG-419N with firmware 1.00(BFQ.3)C0.

Equipment

- NBG-419N
- 1 Network cable. (RJ-45)
- 1 PC or MAC

Login

A web-browser are needed for configuring the NBG-419N. Some of the web browsers that can be used are Chrome browser, Firefox, Internet Explorer, Opera, Safari and etc.

To enter the NBG-419N's web-interface, open the web browser and access <http://192.168.1.1/>

Enter the login password and click login. The standard password is "1234".

If this is the first time the router is being configured, the password should be changed.

Enter the new password in both the fields, and click Apply.

Use this screen to change the password.

The Wizard setup walks you through the most common configuration settings. We suggest you use this mode if it is the first time you are setting up your router or if you need to make basic configuration changes.

Use Advanced mode if you need access to more advanced features not included in Wizard mode.

 **New Password:**

 **Retype to Confirm:**

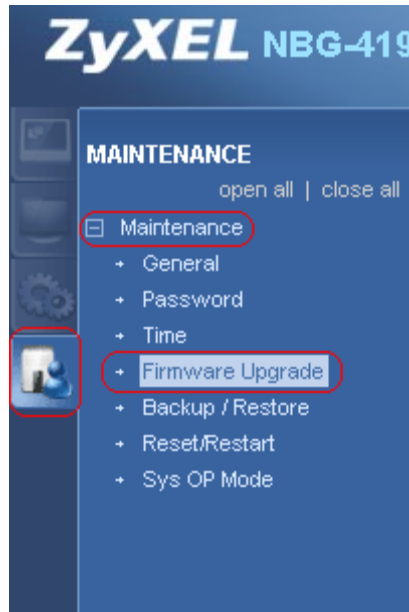

Upload firmware

Click on "Expert mode" in the top menu.

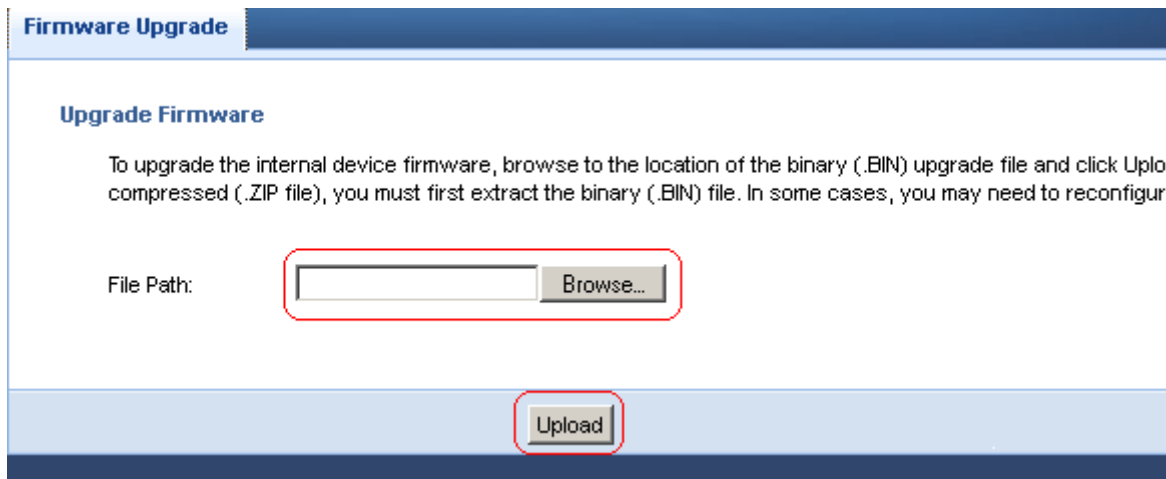

On the new page, click on “Maintenance” and “Firmware Upgrade” in the menu on the left side.

Now click on “Browse”, and select the firmware file. (The file name ends with “.bin”)

Click “Upload”.

You have now updated the firmware on the NBG-419N.
